

Countries with Confirmed Poultry Cases (H5N1) Since 2003

Status as of 16 March 2006

Many of the Anatidae waterbirds (ducks, Geese, Swans) migrate between wetlands in the northern breeding areas and southern non-breeding areas and in doing so, regularly cross the borders of two or more countries. The birds can cover up to 1000 miles/day.

Potential Migratory Routes for Avian Influenza (H5N1) via Waterfowl Flyways from Current Areas of Concern in SE Asia.
